

I met Dennis Farber and went through his Training program with CCP Industries in early April of 2008. The Training I received was very thorough in sales and the selling chemicals. Dennis also did a segment on hypnosis that was very interesting. I found his training to be well thought out and applicable to my situation as a direct salesperson. His hypnosis segment was fascinating and I only wish we could have spent more time on selling chemicals. I would recommend him to anyone who is considering a sales train.
